Hi there,

Welcome to the **Build Something Real: The Serverpod Hackathon**. We're excited to have you join us as we celebrate the release of Serverpod 4, Serverpod Cloud, and App Studio. This event is all about building a real full-stack app with Serverpod. In this document, you will find everything you need to get started.

Your hackathon resources:

- Hackathon Overview - What to submit
- Get started with App Studio
- Serverpod Documentation
- Join the Serverpod Discord - Get support from the Serverpod team and community
- Full rules - All the legal stuff

Your free hosting:

- One month of Serverpod Cloud hosting - Publish your app in minutes

If you have any questions, need support, or want to show off your progress, the Discord server is the best place to be. Share what you're building with the #buildsomethingreal hashtag.

We can't wait to see the amazing full-stack apps you build.

Happy hacking! ✨

The Serverpod Team
